

LITTLITE GOOSENECK LAMPS

L to R: LF6ER, LF12ER, LF18ER

LITTLITE® sleek, low profile gooseneck lamps efficiently produce light in a concentrated area and can easily be aimed exactly where you need it. Using halogen technology, the high intensity lamp emits crisp, bright white light in a tightly controlled pattern for use in any task involving accurate, close or detailed work. A colored red filter easily slides into place over the lamp for night use. There's a perfect spot in any police, fire, ambulance, emergency, or utility vehicle for the various model configurations.

Made of sturdy metal and finished in a durable black, baked enamel, all LITTLITE lamps and accessories are designed and constructed to meet the most demanding needs. The stylish finned hood is uniquely designed to dissipate heat and extend surface life. The units are equipped with a permanently attached gooseneck extending from the end or top of the chassis

and are controlled by your choice of rheostat or on/off switch.

Each unit includes 24 inches of automotive wiring for easy installation, red filter, clear filter, storage clips, and screws for mounting. LITTLITE gooseneck lamps can be easily installed in any 12 volt system and require minimal installation time.

LED LITTLITE lamps for console lighting is the latest release from Federal Signal. Each light is composed of red and white LEDs which eliminates the need for a red filter. Amperage draw has also been reduced to only 100mA, providing cooler and longer lasting operation.

QUICK REFERENCE

FEATURES

- Flexible, durable gooseneck.
- High quality construction.
- Sharp, bright white light.
- Low profile/sleek design.
- Available in 6", 12", and 18" lengths.
- Rheostat or On/Off switch.
- LED models available.
- Federal Signal's standard warranty applies with a 2-year warranty on LED element.

APPLICATIONS

- Emergency and Service Vehicles

ACCESSORIES

- CL Adjustable clip
- LFHK KIT, Hood with O-Ring
